Moscow

Sber

Frontend Developer / Senior Frontend Developer · Remote · Senior

Led the creation of analytical dashboards for a major bank. Responsible for the entire frontend development cycle: from architecture to release.

- Designed a scalable architecture (20+ modules) for a business application from scratch;
- Coordinated a team of 5 developers, bringing the product to release in 6 months;
- Reduced FCP by 40% and bundle size by 35% through memoization, lazy-loading, and code-splitting;
- Implemented an interface for working with heavy tables (10,000+ rows) with virtualization, achieving <100 ms response on filtering;
- Reduced backend requests by 60% and sped up loading 2.5 times by implementing RTK Query and state normalization;
- Introduced Linting and Husky, reducing Code Review time by 20%. Reduced API redundant data by 30% through contract design participation;
- Increased team Velocity by 15% through regular Code Reviews and internal workshops.
